## MASADA Bottle Jacks

### FEATURES

- Rigidly adhering to traditional manufacturing standards, Masada jacks boast high quality.
- Of welded construction throughout, Masada hydraulic jacks are light and durable. Masada's unique base forging method increases resistance to high pressure and gives a degree of durability and performance not found in any other comparable products. As a result, many automobile manufactures choose Masada hydraulic jacks for their products. Among Masada's clients are Isuzu, Mitsubishi, Fuso, Hino, Nissan Diesel, and Mazda.
- Widely used in various fields such as machinery, construction, and Automotive industry.
- All models work both in vertical and horizontal positions. All models have common release stem and valve assemblies, many other parts are also interchangeable from model to model.
- The MHB series can be used as low models, extremely useful for buses fitted with air suspension.
- Where applicable Masada jacks are certified to Australian Standards AS/NZS 2693-1993.

# LIFTECH

## Air / Hydraulic Bottle Jack

Part Number

### LT122AH

Working Load Limit

20,000 kg

Safe distance between jack saddle at closed height and air pump

Swivel Joint

Quick release connector

**NEW DESIGN WITH LOW PROFILE**

The LIFTECH air over hydraulic bottle jack makes lifting not only faster but more importantly safer, as it allows one handed operation enabling the user to watch the lifting of the load more closely.

SPECIFICATIONS	LT122AH
Working Load Limit	20,000 kg
Closed Height	241 mm
Lift	131 mm
Screw Height	80 mm
Maximum Height	452 mm
Net Weight	19 kg

Uses standard workshop air supply.  
If air not available can be operated manually!
